

4K ON THE WACOM CINTIQ PRO 16

Here are the steps to connect the Wacom Cintiq Pro 16 to the Apple MacBook Pro (2016) via USB-C. This connection allows your Cintiq pro to display full 4K (3840x2160) resolution.

- 1 Make sure the power adapter and cable are connected to a wall outlet.

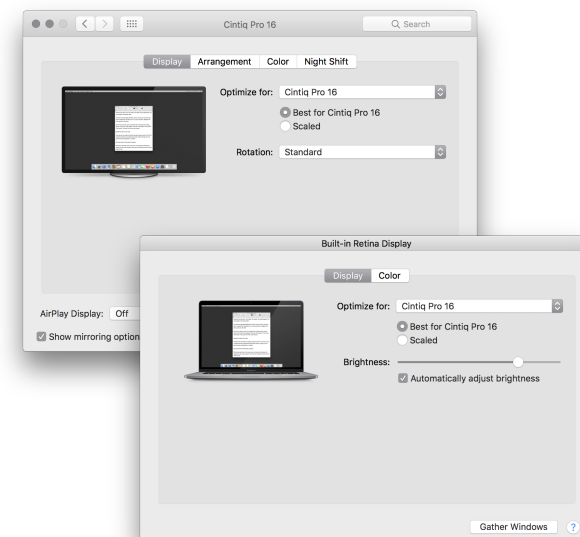

- 2 Connect power to the **lower left** USB-C port.

- 3 Connect the USB-C cable to the **upper left** USB-C port. Only the upper left port works for 4K resolution.

- 4 Connect the other end of the USB-C cable to the Apple MacBook Pro. Then press the power button to turn on the Cintiq Pro 16.

- 5 In Display Settings on the MacBook Pro, select 'Best for Cintiq Pro 16'.
